

DATIM Release 1.21.h was deployed as a maintenance release on June 27th, 2017.

DATIM v1.21.h involves a MER form update to the system.

MER 2.0 Update:

1. HTS_TST Key Populations disaggregate layout update

The HTS_TST indicator was updated to move the Key Populations disaggregate underneath the numerator to improve the quality of data entry. Updated verbiage explains that the Key Populations disaggregates are NOT a testing modality, but should be entered for all HIV tested individuals if applicable for the OU.

Updated forms:

***Note:** the screenshots below show the Community form, but this change impacts all forms with HTS_TST.

Targets

DSD: HTS_TST (Community) Collapse			
Required	Number of individuals who received HIV Testing Services (HTS) and received their test results.		
	Numerator <input type="text"/>		
	Positive Results <input type="text"/>		
Optional	Disaggregated by key population type / Result: To be completed in countries where the environment is safe to collect this information. THIS IS NOT A MODALITY. Data should always be entered at modality type, and additionally for the key population disaggregate, if applicable.		
Category	Positive	Negative	Sub-total
PWID	<input type="text"/>	<input type="text"/>	<input type="button" value="Subtotal"/>
MSM	<input type="text"/>	<input type="text"/>	<input type="button" value="Subtotal"/>
Transgender People	<input type="text"/>	<input type="text"/>	<input type="button" value="Subtotal"/>
FSW	<input type="text"/>	<input type="text"/>	<input type="button" value="Subtotal"/>
People in prison and other closed settings	<input type="text"/>	<input type="text"/>	<input type="button" value="Subtotal"/>
