Overview of changes

- Updates to several MER 2.0 FY17 Q4 RESULTS data entry screens. Please note – only Q4 annual data entry screens were updated. LAB_PTCQI is also the only indicator to have undergone updates for FY17 Q4 that differ from the COP17/FY18 Target data entry forms.
- Functional and layout enhancements to promote data quality.

Please reference the appendix section for screenshots of new and updated indicators. Screenshots are not provided for indicators that have not undergone changes since the original MER 2.0 release in January 2017. ***Please reference those indicator screen shots in the 1.19 DATIM release on DATIM Support [here](#).**

1.22.a Change Details:

1. Prevention – ‘Other’ Tab

1.1. [FPINT_SITE](#)

Dataset Association = *MER Results: Facility Based (Includes DoD)*.

- **Changes** – The *MER Results: Facility Based – DoD* data entry form now includes a numerator for aggregated DoD site level totals.

2. Health Systems – ‘Other’ Tab

2.1. [HRH_PRE](#)

Dataset Association = *MER Results: Operating Unit Level (IM)*. Reference screenshots in the Appendix section.

- **Changes** – Update the disag title verbiage to say "Disaggregated by Cadre Category".

2.2. [HRH_CURR](#)

Dataset Association = *MER Results: Facility Based, MER Results: Community Based (Includes DoD)*, and *MER Results: Operating Unit Level (IM)*. Reference screenshots in the Appendix section.

- **NEW** - New data set association for reporting at the OU level: *MER Results: Operating Unit Level (IM)* in addition to the community and facility level data sets. NOTE – The OU Level form differs from the facility and community data entry forms.
- **Changes** - Update the verbiage and cadre category list order for Facility and Community forms. Remove the 3rd Staff Support type "Staff Receiving ONLY Non-Monetary Support (FTE)" from the OU level form that had originally been released for MER 2.0.

2.3. [HRH_STAFF](#)

Dataset Association = *MER Results: Facility Based (Includes DoD)*. Reference screenshots in the Appendix section.

- **Changes** – Updated the Cadre Category disaggregate title with the word “Cadre”, and put “Clinical Service” second in the cadre category list order.

2.4. [EMR_SITE](#)

Dataset Association = *MER Results: Facility Based (Includes DoD)*. This is a NEW indicator being collected beginning FY17 Q4.

- **NEW** – The *MER Results: Facility Based – DoD* form allows users to enter data for each service delivery area, to include a numerator for aggregated DoD site level totals.
- **NEW** – The *MER Results: Facility Based* data entry form only offers drop down option sets to enter a “Yes” value for each service delivery area. Users cannot enter data and there is no numerator.

2.5. [LAB_PTCQI](#)

Dataset Association = *MER Results: Facility Based*, *MER Results: Community Based* (Includes DoD), and *MER Results: Operating Unit Level (IM)*. Reference screenshots in the Appendix section.

- **NEW** - The *MER Results: Facility Based – DoD* form allows users to enter aggregated site level totals for number of facilities with Labs or Point of Care Sites.
- **Changes** – The option set drop down menus originally deployed for MER 2.0 have been updated to allow users to enter data values. The new LAB_PTCQI data entry form for FY17 Q4 differs from the COP18/FY18 Target entry form.

3. **Deprecated Indicator**

- The INVS_COMD indicator that was updated and deployed for MER 2.0 Results in DATIM version 1.21, was removed prior to FY17 Q4 data entry.
