

DATIM Version 23.9.19: Upgrade Release Notes

DATIM has been updated to DHIS2 from version 38 to version 40. This includes several app improvements, performance enhancement, new features, security improvements, and bug fixes.

If you are interested in learning more about DHIS2 version 40, you can view more information at [the DHIS2 version 40 Overview page](#).

Remember to clear your browser cache when you first log in to ensure that features are updated!

New App Icons

DHIS2 version 40 introduces a new set of icons for the core DHIS2 applications. These new icons all have the same design and style so they look cleaner than the previous versions.
