

DATIM Release 1.17 was deployed on Friday, October 14, 2016.

New dataset available: Tiered Support: Facilities Reporting TX_CURR

Purpose: This dataset is offered at the FACILITY level, to allow users to enter the number of site visits made during the fiscal year (October through September) to facilities reporting on TX_CURR.

Note: Code lists for the Tiered Site Support dataset are viewable on the "[DATIM Data Exchange Instructions and Code Lists](#)" page within [DATIM Support](#). Reference the following sections for code lists corresponding to this dataset: "Tiered Site Support Data Elements" and "Tiered Site Support Option Set List". Code lists are provided in the following formats: HTML, JSON, CSV, XML.

Please see the Tiered Site Support data entry screen below:
