

DATIM Release 1.24.d was deployed as a maintenance release on June 26, 2018.

DATIM 1.24.d includes an update to the wording of an OVC\_HIVSTAT disaggregate.

**Update:**

- **Change wording for disaggregate under OVC\_HIVSTAT**

The wording of the data element category option combo for the disaggregate “No HIV status reported to the implementing partner” under OVC\_HIVSTAT was changed from "Undisclosed to IP" to "No HIV Status". There was no change to the wording on the data entry screen. This update was made so the data elements match the MER Guidance as "No HIV Status" instead of “Undisclosed to IP”.

**Prior to change:**

DSD: TB\_STAT (Denominator)  
 en Hospital - July - September 2017 - OVC\_HIVSTAT (N, DSD, ReportedStatus): OVC Disclosed Known HIV Status **No HIV Status**

DSD: OVC_HIVSTAT	
<b>Auto-Calculate</b>	Number of OVC with HIV status reported to implementing partner (including status Numerator will auto-calculate from Status Type Disaggregate.
Numerator	<input type="text" value="Subtotal"/>
<b>Required</b>	<b>Disaggregated by Status Type</b>
Reported HIV positive to IP (includes tested in the reporting period and known positive)	<input type="text"/>
Of those positive: Currently receiving ART	<input type="text"/>
Of those positive: Not Currently receiving ART	<input type="text"/>
Reported HIV Negative to IP	<input type="text"/>
No HIV status reported to the implementing partner	<input type="text" value="1"/>
Of those not reported: Test not indicated	<input type="text"/>
Of those not reported: Other Reasons	<input type="text"/>

**After change:**

The category option combination has been updated to "No HIV Status".
