

DATIM Release 1.24.f was deployed as a maintenance release on July 10, 2018.

DATIM 1.24.f includes an update to PEPFAR metadata.

Update:

- **DATIM Landing Page: Fit text to screen resolution and zoom settings**

The DATIM landing page was updated to allow all Important Notice and version text to display at lower resolution.

- **Data and Dedupe Timestamp Comparison in the Dedupe App**

During Uganda's data import, deduplications were not carried over. DATIM has been updated to ensure deduplication submitted via DATIM4U import contain the deduplicated data.
