

DATIM Release 1.27.b was deployed on January 17, 2019.

DATIM 1.27.b includes an update to the HTS\_INDEX indicator and a fix to the Data approvals app.

**MER Update:**

- **HTS\_INDEX data entry form update**

The HTS\_INDEX data entry form disaggregate for the “**Number of contacts elicited by HIV status and age/sex**” has been changed in order to remove the “HIV Status” dimension. It now disaggregates by coarse age/sex only for the “**Number of contacts elicited by age/sex**”. The complete HTS\_INDEX indicator screenshot is included at the end of these release notes.

**This update also DELETED any prior data entered for the 3<sup>rd</sup> disaggregate (Number of contacts elicited). Any data that was previously entered will need to be re-entered using the new disaggregate options.** Data entered for the rest of HTS\_INDEX should not be affected.

**BEFORE:**

The following MER Results Data Sets with this indicator have been updated in DATIM (this update is not applicable for MER Targets):

- MER Results: Facility Based (DSD/TA)
- MER Results: Community Based (DSD/TA)
- MER Results: Facility Based - DoD ONLY (DSD/TA)
- MER Results: Community Based - DoD ONLY (DSD/TA)

- **Data Approvals app**

An issue has been resolved in the Data Approval app where the “auto-calculation” fields in the data set indicator screens were not displaying totals.

Updated HTS\_INDEX indicator data entry form:

DSD: HTS_INDEX (Facility) <span style="float: right;">- Collapse</span>
