DATIM Release 1.27.i was deployed on April 23, 2019.

DATIM 1.27.g includes updates to the AGYW data entry screen.

Update:

- **AGYW "Time" disaggregates updated**

  The AGYW disaggregates for Time were updated to the following:
    - 0-6 months
    - 7-12 months
    - 13-24 months
    - 25+ months

  Prior to this change, the disaggregates were 0-6 monts, 6-12 months, 12-24 months, and 25+ months. This change affects the data entry screen as well as the data element codes and names. This does not affect the UID or data that has already been entered in any way.
