DATIM Release 1.28.m was deployed on November 26, 2019.

DATIM 1.28.m includes Numerator verbiage update

Update:

- **Update HTS_RECENT Numerator verbiage for clarification. The updated verbiage states:**

  - Number of newly diagnosed HIV-positive persons aged ≥15 years with a test for recent infection result of 'recent infection' during the reporting period. The Numerator will auto-calculate from the sum of Age/Sex/Indication Disaggregate.

DSD: HTS_RECENT (Numerator)	- Collapse
Auto-Calculate	Number of newly diagnosed HIV-positive persons aged ≥15 years with a test for recent infection result of 'recent infection' during the reporting period. The Numerator will auto-calculate from the sum of Age/Sex/Indication Disaggregate.
