DATIM Release 1.29.p was deployed on June 02, 2020.

DATIM 1.29.p includes a fix to User Administrator roles

Update:

- **User Administrator Update:**
    - This fix ensures that User Administrators have all the roles of the groups they are managing. Previously, a small number of User Administrators were missing some of the roles.
    - This fix ensures that Global Users have read only access, all the time, to all of the streams.
