

DATIM Release 1.32.aj was deployed on August 23, 2022.

DATIM 1.32.aj Includes ERB and Semi-Annual Snapshot Indicators updates

- **ERB Update:**
 - ERB has been updated to 1.2.3.

- **Semi-Annual Snapshot Indicators Update:**
 - The Q3 values for Semi-Annual Snapshot Indicators have been set to equal the Q2 value for that indicator. Snapshot indicators do not aggregate over reporting periods, instead they are a snapshot of the current total value for that indicator. The indicators this affects are AGYW_PREV, OVC_HIVSTAT, OVC_SERV, and TX_TB.
